

➔ How to improve your production efficiency?

➔ What are the ways to future proof your business?

These questions as long as many others will be discussed at open Bronx workshop, which will take place in the framework of Metal-Expo 2019, on November 14, from 10 am to 1:30 pm in Room 238, Pavillion 75, Hall 2, VDNH

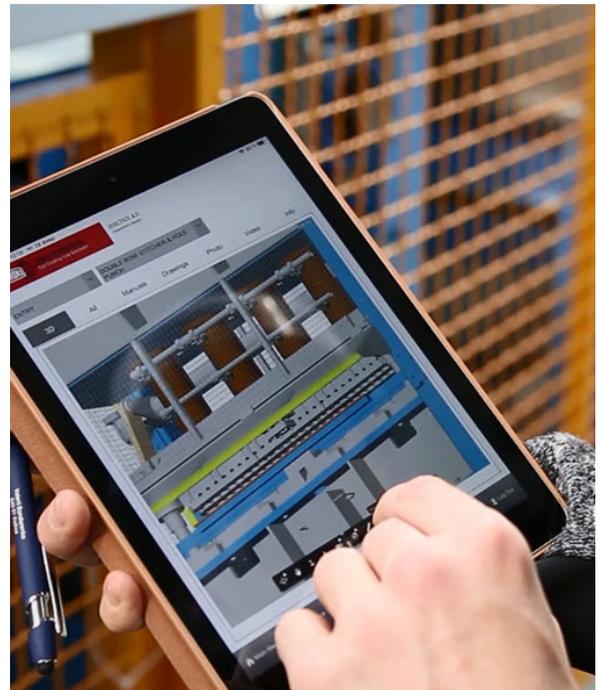

**The following papers will be presented at the workshop:**

% Future proofing your business and return on investment – Robert Ruelle

& iBronx and Industry 4.0 – Khonraed Gill

' "Embossing technology –Adam Lewis

After the workshop there will be a Q&A session.

Workshop attendees will have a unique opportunity to get acquainted with our latest development – iBronx, the system, engineered to facilitate the process of technical maintenance of equipment. The visitors will be able to hold in their hands a device dedicated for remote control of technical state of a line and feel themselves on the forefront of progress as well as communicate to Bronx specialists and learn new market trends.

Anyone who wishes to attend the workshop can do so. Apart from the workshop you can visit Bronx at the booth № 2G09
